Specifications

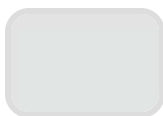

All PDM ribbed panel doors are constructed of 2" steel hemmed rails with tongue and groove section joints and 18 gauge stiles. Stiles are fastened to the section skins by using a strong interlocking clinch joint that does not require external fasteners, which typically causes interference when fastening hardware.

- Heavy-Duty 14 or 11 Gauge Hinges
- 2" or 3" Steel 10-Ball Bearing Rollers (as required)
- 2" or 3" Galvanized Steel Track (as required)
